AUTOMATIC LABELLING MACHINES

E Series automatic labelling machines cover a wide range of containers and label types ensuring efficient and reliable operation. They are available as one sided or two-sided versions, suitable for various shapes of bottles, drums and other types of containers.

They can be operated efficiently and economically without need for highly skilled operators thanks to their ergonomic design; operation and maintenance are very easy.

Technical Features

- Stainless steel construction
- Touchscreen microprocessor control
- Adjustable offset
- Adjustable conveyor height
- Herma modules
