AUTOMATIC CAPPING MACHINES

Our automatic capping machines offer reliable solutions for a wide range of applications and production volumes. We manufacture various types of cappers like spindle cappers, pick&place robotic arm screw cappers, as well as chuck and snap cappers, suitable for all types of bottles and containers.

K Series automatic capping machines can be operated efficiently and economically without need for highly skilled operators thanks to their ergonomic design and automation; operation and maintenance are very easy.

Technical Features

- Stainless steel construction
- Door safety switches
- Bottle holder belt
- Belt speed control
- Laser sensors
- Festo valves, and pneumatic fittings
- Arsanmak air motor
- Touch screen microprocessor control
